Steven M. Marantz, Clerk
Mark P. Gold, Member
Richard Foster, Member
Mike Barbieri, Administrative Assistant

Gentlemen,

On May 3rd 2021, I as well as other representatives of Eversource Energy attended the Longmeadow Select Board Meeting via a virtual zoom call. We discussed details concerning an upcoming Eversource project which involves the installation of telemetry cabinets at existing regulator stations in Longmeadow Massachusetts.

The telemetry devices being installed are a safety enhancement to existing infrastructure in the Town of Longmeadow, the devices will enhance the safety and reliability of low pressure systems in the Eversource Gas distribution systems. These devices will relay important system data to the Eversource Control Room and will allow Eversource to continuously monitor the gas system.

The Select Board has requested additional details concerning other Eversource projects in the area. This work does not increase the Eversource Gas footprint, customer base or capacity of existing systems. This work is in no way related to the Western Massachusetts Reliability Project.

Please feel free to contact me with additional questions and I look forward to attending the next Select Board meeting to discuss this project further.

Sincerely,

Richard Salvarezza, P.E.
Project Engineer
